

Fire Risk Assessment.

Duration: One day.

Course overview:

Past experience has demonstrated that lack of preparation for fire situations can be devastating and costly to human life and to property. The risk of fire can be greatly reduced or eliminated by proper training and practice of appropriate preventative measures.

This programme covers the major aspects of undertaking a fire risk assessment and the necessary controls to prevent fires from starting as required by the Regulatory Reform (Fire Safety) Order 2005.

Course content:

Upon completion the delegates will have gained knowledge of:

- Fire protection and prevention.
- Why use a risk assessment.
- Legal requirements and enforcement.
- Fire triangle.
- Hot working.
- Hazard recognition.
- Control measures.
- Risk assessment in practice.

The training enables the delegates to be competent to undertake a fire risk assessment upon completion.
